## Summary

I'm a junior software engineer with experience developing dynamic, accessible, and quality applications. I have created over 20 websites using HTML, CSS, CSS frameworks, ReactJS, ExpressJS, and MongoDB. Apart from that, I'm also skilled in Android development where I have developed robust solutions to cross-cutting issues such as Education. I'm currently increasing my skills in backend engineering and plan to become a specialist in backend engineering.

## Licenses & Certifications

**JavaScript Algorithms and Data Structures** - freeCodeCamp
